Calor Gas Cylinders

Please DO NOT take to any of Southend-on-Sea Borough Council's Household Waste Recycling Centres because they are NOT waste.

If the cylinder is leaking badly and you are concerned, contact the manufacturer or the Fire Brigade.

Calor gas cylinders are NOT waste but remain the property of the issuing company.

Typically, Butane cylinders are used for caravanning and portable heating, whilst Propane cylinders are used for domestic heating and cooking.

Some Propane cylinders are marked as Patio cylinders and are used for barbecue and patio heaters.

For further information and to find your nearest retailer, please visit the Calor Gas website or call them on 0800 662 663.

Calor gas cylinders should be returned to the address shown on the label.

Camping Gas Cylinders are disposable, i.e. non-returnable cylinders. They are non-refillable gas cartridges containing butane for camping use, commonly 190 grams net weight.

- Whenever possible use material up in accordance with manufacturer’s instructions.
- If you cannot use up, please EMPTY COMPLETELY: open valve to discharge gas somewhere outside that is safe and away from naked flames. Once empty, these disposable cylinders can be placed in the black refuse sack.
- If the cylinder is leaking, leave it somewhere safe outside until it is completely empty.
- Any full camping or disposable gas cylinders that are placed in the black refuse sack will NOT be collected.
